

Press Release

Europe's largest meeting point for the paper and board surface upgrading sector: trends, innovations, industrial diversity, and networking platform

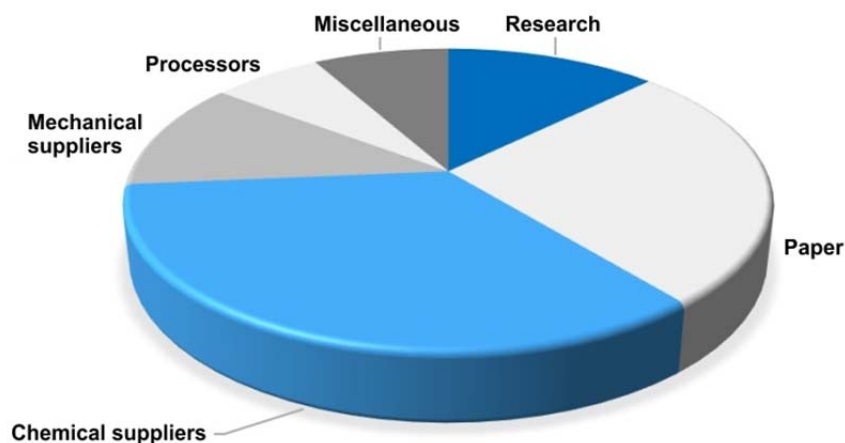

05/09/2019, Heidenau. 250 participants, 20 presentations, a very well-attended exhibitor forum, and a lively exchange between participants – Papiertechnische Stiftung (PTS), the organizer of the 29th PTS Coating Symposium 2019, is very satisfied with the event and its results.

The motto of this year's symposium, 'upgraded - smart - bio', received good response among the participants who listened with great interest to the key note speakers and presenters and gained new insight into bioeconomy, sustainable packaging, barriers and circular economy.

During the two days of the event, the exhibition space was a very busy spot for networking and business talks to discuss the programme topics and make new contacts.

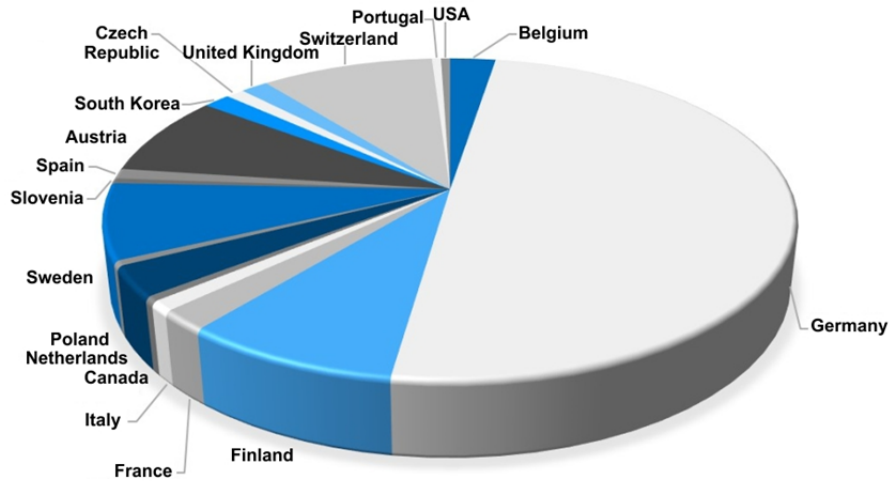

The industrial diversity and internationality of the participants illustrates the significance of the PTS Coating Symposium.

Participants by industries

(source: PTS)

Participants by countries (18 countries)

(source: PTS)

The conference papers covered a wide range of subjects falling within the scope of the motto, ranging from social topics through market trends to new plant and equipment, resources and eventually new products. For instance, Dr. Yannick Vercammen presented new solutions in the field of biowaxes and barriers from Solenis; Dr. Tobias Meckel from TU Darmstadt showed most recent methods of confocal microscopy in an impressive manner while looking into basic mechanisms of liquid transport in papers. The evening programme with the singer Amy Warning and the dinner provided an excellent setting beyond the technical background of the event.

We address our special thanks to the exhibitors and sponsors of the 29th PTS Coating Symposium 2019 for their enriching presentations and exhibition stands.

Exhibitors:

- Saueressig & Ungricht - surface solutions
- ACA Systems OY
- Trinseo Europe GmbH
- CPKelco
- UMV Coating Systems AB
- wolf heilmann
- Servophil AG
- TSE Troller AG

Sponsors:

- GAW Technologies GmbH
- Saueressig & Ungricht - surface solutions
- Cirkel AG
- Moritz Weig GmbH & Co. KG
- APR – Papier-Rundschau
- Wochenblatt für Papierfabrikation
- Coating International

Prof. Dr. Frank Miletzky and Dr. Marcel Haft, the managers of the event, and the PTS team are looking forward to the 30th PTS Coating Symposium in 2021.

Event management:

Prof. Dr. Frank Miletzky

About Papiertechnische Stiftung

We are a research and service institute headquartered in Heidenau (near Dresden), Germany, supporting companies from all industries in the development and application of modern fiber-based solutions. We develop, optimize, inspect and test products and methods in the fields of paper manufacture and paper processing, fiber and composites, upgrading, packaging, corrugated board and innovative measuring equipment.

A proud member of the research and technology association AiF (Arbeitsgemeinschaft industrieller Forschungsvereinigungen "Otto von Guericke" e.V. www.aif.de) and of the industrial research association Zuse-Gemeinschaft (www.zuse-gemeinschaft.de), Papiertechnische Stiftung is part of two networks that are committed to the enhancement of applied research for medium-sized enterprises, translating scientific findings into practical technologies and thus lay the ground for innovation.
